From a general point of view, even the highest performance equipment will not by itself solution all the situations.

It does not completely cancel the risk encountered by the special units' users on an operation.

As a manufacturer we owe to ourselves and to the users to give priority to quality, reliability, performance and innovations.

We will never be confronted to front line situations but you on the other hand are facing them daily in France or elsewhere around the world and sometime while using one of our tools.

It is at this very moment that our choice of components, raw material to manufacture the tools that you are using, at this very moment when you are about to give the "GO ahead" that the equipment must prove itself failproof!

Internationally, France benefits from a strong reputation in the fields of security at the operational knowhow level as much as in the equipment manufacturing.

At LIBERVIT, we are experienced technicians, our professional ethic is unwavering and above all we know and respect those using our products and because of this close relationship we have considered their insights and suggestions in the making of our tools.

We pride ourselves in manufacturing French. All the labelled equipment that you had, have or will have in your hands, are made in France with more than 90% of components and raw materials of French origin or from close European Union countries such as Germany, Norway and Italy.

Our 30 years in the design and manufacturing of hydraulic and mechanical tools with land and water applications for the army and police special forces, our seriousness, our professionalism, and our never ended search for innovations has made us a key player within these professional environments.

LIBERVIT is represented in over 60 countries through our specialized Distributors network offering commercial advice, demos, maintenance and after sale service.

All of the LIBERVIT team and myself are available to ensure that none of your question remains unanswered.

We wish you a pleasant read.

Yvan CARDONA, CEO

We would like to thank you for the trust you keep showing us every day. LIBERVIT has been and still is extremely proud of manufacturing high quality entry tools and to dedicate its resources to design, developing and sharing experiences with end-users. It honours us to display your insignia, a proof of our long lasting relationship, and it would honour us if you would consider sending us yours to appear in our next edition.

## Quality & Reliability

Unless otherwise specified by us, our equipments are guaranteed for 3 years from the dispatch date\*.

All our equipments comply with **CE** standard.

Our organization, from engineering to customers' service is ISO 9001 certified.

All our tools undergo rigorous test & control before shipment. It guarantees a high quality, life-long performance and complete reliability of our tools and equipment. The guarantee covers construction defects as well as material flaws noted by our services.

LIBERVIT will provide, for a minimum of 10 years after delivery, any of its tools' spare parts.

\* with the exception of products not manufactured by LIBERVIT.

# EBPN1 - entry nano tools' kit

this small backpack has been designed to carry a NBSI sledge hammer and a NPB pry bar.

# EBPN1 - entry nano tools' kit

## EBPN1

The EBPN1 entry nano tools' backpack rack kit has been designed to carry a NBSI sledge hammer and a NPB pry bar. The tools are stowed on the backpack rack with the help of straps & quick-release buckles.

The back is padded with a high density foam for comfort and also with 4 female quick-release buckles to clip any kind of accessories supplied with a male quick-release buckles.

To transport the backpack rack, by hand with a reinforced handle or by shoulder with a removable strap with quick-release buckles (ref. SP/N). A removable protection sleeve to cover the whole equipment in extreme weather is available on option and can be store in a zipped storage pocket on the bottom backpack rack.

On option, adjustable and removable backpack shoulder straps with emergency quick-release buckles can be set on the back of the EBPN-A backpack rack.

### TECHNICAL CHARACTERISTICS

entry nano tools backpack rack	ref. EBPN1
includes :	
backpack rack empty	ref. EBPN-A
removable strap with quick-release buckles	ref. SP/N
sledge hammer	ref. NBSI
pry bar	ref. NPB
backpack rack material	Cordura® advanced fabric (1100 Den)
backpack rack available colours	dark grey or olive green or camouflage
sleeve IP index	IP64
reinforced handle	yes

backrest	rigid and padded
zipped storage pocket	yes, compartment for the removable protection sleeve
transport modes	by hand, on shoulders
configuration	to set a NBSI sledge hammer & a NPB pry bar
EBPN-A dimensions	430 x 260 x 70 mm - 15 x 10 x 3 inch
EBPN-A weight empty	520 g - 1 lbs
EBPN1 weight fully equipped	2.9 kg - 6.5 lbs
removable protection sleeve	on option, ref. HP/EBPN-A, to store in the EBPN-A's zipped pocket
pair of backpack shoulder straps' emergency release buckles	on option, ref. EPGD, to set on the back of the EBPN-A backpack rack, removable and adjustable

## NBS1

transport strap

The NBS1 sledgehammer is usually used to quickly gain entry.  
The grip handle answers the NF EN 60900 norms as it is insulating and can protect from up to 1000V in alternating current and up to 1500V in direct current. The sledgehammers are made of steel.  
A EBP-N-A tactical bag has been designed to carry on the back a NBS1 small sledgehammer and a NBP small lever.

BS5, BS3 & NBS1 sledgehammers

Electrical shocks' rubber protection handle

1 kg sledgehammer' s head

### TECHNICAL CHARACTERISTICS

sledgehammer	ref. NBS1
sledgehammer head weight	1 kg
protection handle	electrical shocks' protective coating
available colours	dark grey or olive green
total length	305 mm - 1 ft
